

Kerner

Rooting on moraine soils mixed with primitive rocks, our Kerner develops its vivid acidity and racy elegance. The fleeting, fruity bouquet of peach, apricot and mandarin flatters the palate with its pleasant fruit and freshness. Perfect as an aperitif or accompanying light, summery dishes and salads.

This small vineyard, located southeast of Nals, offers the ideal soil conditions for Kerner and Riesling. Its soft moraine soil, interspersed with primitive rock (mainly porphyry), supplies the vines' deep growing roots with valuable minerals.
